SUBJECT INDEX

A

Actin filament — Ultrastructural localization of concanavalin A receptors in the plasma membrane : association with underlying actin filaments, 1

***Allium cepa* meristems** — G_1 and G_2 arrest achieved in root meristems by black light irradiation under anoxia, after DNA bromosubstitution, 119

Analytical ion microscope — Changes in iodine mapping in rat thyroid during the course of iodine deficiency : imaging and relative quantitation by analytical ion microscope, 145

p125/6.5 antigen — Changes in a nuclear matrix antigen during the cell cycle : interphase and mitotic cells, 105

Asbestos — Growth of normal and neoplastic rat pleural mesothelial cells in the presence of conditioned medium from neoplastic mesothelial cells, 293

Auxin — *In vivo* binding of auxin to the plasmalemma and tonoplast of parenchymal cells in the wheat coleoptile, 275

Axolotl — Blastema cell proliferation *in vitro* : effects of limb amputation on the mitogenic activity of spinal cord extracts, 183

B

Biosynthesis — Biosynthesis of glycosaminoglycans in the human colonic tumor cell line Caco-2 : structural changes occurring with the morphological differentiation of the cells, 255

Bromosubstitution — G_1 and G_2 arrest achieved in root meristems by black light irradiation under anoxia, after DNA bromosubstitution, 119

C

Caco-2 — Biosynthesis of glycosaminoglycans in the human colonic tumor cell line Caco-2 : structural changes occurring with the morphological differentiation of the cells, 255

Cell culture — Blastema cell proliferation *in vitro* : effects of limb amputation on the mitogenic activity of spinal cord extracts, 183

Cell cycle — Quantitative ultrastructural study of nucleolus-organizing regions at some stages of the cell cycle (G0 period, G2 period, mitosis), 211

Cell growth — Growth of normal and neoplastic rat pleural mesothelial cells in the presence of conditioned medium from neoplastic mesothelial cells, 293

Centriologenesis — Ciliogenesis and centriole formation in the mouse embryonic nervous system. An ultrastructural analysis, 165

Chloroplasts — Immunocytochemical detection of ribulose bisphosphate carboxylase in capsicum plastids, 289

Chromatin — Anti-bromodeoxyuridine monoclonal antibody : an alternative tool for the identification of replicated DNA at the electron microscope level, 99

Chromoplasts — Immunocytochemical detection of ribulose bisphosphate carboxylase in capsicum plastids, 289

Ciliary beat — Ciliary beat and cell motility of *Dunaliella* : computer analysis of high speed microcinematography, 229

Ciliogenesis — Ciliogenesis and centriole formation in the mouse embryonic nervous system. An ultrastructural analysis, 165

Coleoptile — *In vivo* binding of auxin to the plasmalemma and tonoplast of parenchymal cells in the wheat coleoptile, 275

Collagen fibrils — Spatial organization of collagen in annelid cuticle : order and defects, 17

Collagen gel — Morphological and functional differentiation of human thyroid cells in collagen gel culture, 247

Color-shaded image — Three-dimensional computer reconstructions from serial sections of cell nuclei, 111

Concanavalin A receptor — Ultrastructural localization of concanavalin A receptors in the plasma membrane : association with underlying actin filaments, 1

Cultured thyroid cells — Polarity reversal of inside-out thyroid follicles cultured within collagen gel : structure of the junctions assessed by freeze-fracture and lanthanum permeability, 133

Cultured fibroblasts — Biochemical and ultrastructural features of human fibroblasts cultured from a new variant of type 3 lipid storage myopathy, 39

Cytology — Regeneration of muscles after cardiotoxin injury. I. Cytological aspects, 171

Cytoskeleton — The somatic function of the micronucleus in asexual reproduction of *Paramecium* : thermosensitivity of amicronucleates, 219

D

3-D reconstruction — Three-dimensional electron microscopy of the nucleolus and nucleolus-associated chromatin (NAC) during early germination of *Zea mays* L., 65

Development — The somatic function of the micronucleus in asexual reproduction of *Paramecium* : thermosensitivity of amicronucleates, 219

Differential/competition screens — Isolation of developmentally regulated genes in *Drosophila melanogaster*, 57

Differentiation — Morphological and functional differentiation of human thyroid cells in collagen gel culture, 247

DNA detection — Anti-bromodeoxyuridine monoclonal antibody : an alternative tool for the identification of replicated DNA at the electron microscope level, 99

DNA immunolocalization — Anti-bromodeoxyuridine monoclonal antibody : an alternative tool for the identification of replicated DNA at the electron microscope level, 99

DNA synthesis — Lectin-like components in the macronuclear replication bands of *Euplotes eurystomus*, 95

Drosophila melanogaster — Isolation of developmentally regulated genes in *Drosophila melanogaster*, 57 — Comparative study of molecular characteristics of X and Y nucleolar organizers of various lines of *Drosophila melanogaster*, 201

Duodenum — Immunocytochemical localisation of GABA in endocrine cells of the rat entero-pancreatic system, 265

E

Electron microscope — Three-dimensional computer reconstructions from serial sections of cell nuclei, 111
Endocrine cells — Immunocytochemical localisation of GABA in endocrine cells of the rat entero-pancreatic system, 265
Epithelial cell line — Culture of an epithelial cell line (MDCK) with a serum substitute, 241
Euplotes — Replication bands and nucleoli in the macronucleus of *Euplotes eurystomus :* an ultrastructural and cytochemical study, 83

F

Fibrillar center — Quantitative ultrastructural study of nucleolus-organizing regions at some stages of the cell cycle (G0 period, G2 period, mitosis), 211
Flagella — Ciliary beat and cell motility of *Dunaliella :* computer analysis of high speed microcinematography, 229
Fluorescence microscopy — Lectin-like components in the macronuclear replication bands of *Euplotes eurystomus*, 95
Fluorescence polarization — Membrane fluidity of *Toxoplasma gondii :* a fluorescence polarization study, 11
Freeze-fracture — Polarity reversal of inside-out thyroid follicles cultured within collagen gel : structure of the junctions assessed by freeze-fracture and lanthanum permeability, 133

G

G_1 and G_2 control points — G_1 and G_2 arrest achieved in root meristems by black light irradiation under anoxia, after DNA bromosubstitution, 119
GABA — Immunocytochemical localisation of GABA in endocrine cells of the rat entero-pancreatic system, 265
Gastrula differential sequences — Isolation of developmentally regulated genes in *Drosophila melanogaster,* 57
Glycoprotein distribution — Ultrastructural localization of glycoproteins in rabbit fibroblasts altered by *Herpes simplex* virus type 1 infection, 47
Glycosaminoglycans — Biosynthesis of glycosaminoglycans in the human colonic tumor cell line Caco-2 : structural changes occurring with the morphological differentiation of the cells, 255
Growth processes — Spatial organization of collagen in annelid cuticle : order and defects, 17

H

Heat — The somatic function of the micronucleus in asexual reproduction of *Paramecium :* thermosensitivity of amicronucleates, 219
Helicity — Spatial organization of collagen in annelid cuticle : order and defects, 17
Hemolytic plaque test — Transferrin secretion and hepatocyte ploidy : analysis at the single cell level using a semi-automatic image analysis method, 125
***Herpes simplex* virus type 1** — Ultrastructural localization of glycoproteins in rabbit fibroblasts altered by *Herpes simplex* virus type 1 infection, 47
Human thyroid cell — Morphological and functional differentiation of human thyroid cells in collagen gel culture, 247
Hybridoma cell — Microcalorimetric studies of hybridoma cells, 33

I

Image analysis — Transferrin secretion and hepatocyte ploidy : analysis at the single cell level using a semi-automatic image analysis method, 125 — Ciliary beat and cell motility of *Dunaliella :* computer analysis of high speed microcinematography, 229
Immunoblotting — Human serum reacting specifically with a subset of 1b-tubulin isoforms, 157
Immunocytochemistry — Immunocytochemical localisation of GABA in endocrine cells of the rat entero-pancreatic system, 265 — Immunocytochemical detection of ribulose bisphosphate carboxylase in capsicum plastids, 289
Immunofluorescence — Human serum reacting specifically with a subset of 1b-tubulin isoforms, 157
Immunogold staining — Ultrastructural localization of concanavalin A receptors in the plasma membrane : association with underlying actin filaments, 1
Interphase and mitotic cells — Changes in a nuclear matrix antigen during the cell cycle : interphase and mitotic cells, 105
Iodine metabolism — Changes in iodine mapping in rat thyroid during the course of iodine deficiency : imaging and relative quantitation by analytical ion microscope, 145
Isolated hepatocytes — Transferrin secretion and hepatocyte ploidy : analysis at the single cell level using a semi-automatic image analysis method, 125
Iron mineralization — The iron mineralization of *Spongia officinalis* L. (Porifera, Dictyoceratida) and its relationships with the collagen skeleton, 189

L

Lanthanum — Polarity reversal of inside-out thyroid follicles cultured within collagen gel : structure of the junctions assessed by freeze-fracture and lanthanum permeability, 133
Limb regeneration — Blastema cell proliferation *in vitro :* effects of limb amputation on the mitogenic activity of spinal cord extracts, 183
Liquid crystals — Spatial organization of collagen in annelid cuticle : order and defects, 17

M

Maternally expressed genes — Isolation of developmentally regulated genes in *Drosophila melanogaster,* 57
MDCK cells — Culture of an epithelial cell line (MDCK) with a serum substitute, 241
Membrane fluidity — Membrane fluidity of *Toxoplasma gondii :* a fluorescence polarization study, 11
Membrane preparation — A membrane preparation that contains proteins characteristic of the rough endoplasmic reticulum, 281
Mesothelial cell — Growth of normal and neoplastic rat pleural mesothelial cells in the presence of conditioned medium from neoplastic mesothelial cells, 293
Metabolism — Microcalorimetric studies of hybridoma cells, 33
Microcalorimetry — Microcalorimetric studies of hybridoma cells, 33
Micronucleus — The somatic function of the micronucleus in asexual reproduction of *Paramecium :* thermosensitivity of amicronucleates, 219
Modelling — Ciliary beat and cell motility of *Dunaliella :* computer analysis of high speed microcinematography, 229
Monoclonal antibody — Anti-bromodeoxyuridine monoclonal antibody : an alternative tool for the identification of replicated DNA at the electron microscope level, 99
Morphological differentiation — Biosynthesis of glycosaminoglycans in the human colonic tumor cell line Caco-2 : structural changes occurring with the morphological differentiation of the cells, 255
Motility — Ciliary beat and cell motility of *Dunaliella :* computer analysis of high speed microcinematography, 229
Mouse embryogenic nervous system — Ciliogenesis and centriole formation in the mouse embryonic nervous system. An ultrastructural analysis, 165
Multisystemic lipid storage myopathy — Biochemical and ultrastructural features of human fibroblasts cultured from a new variant of type 3 lipid storage myopathy, 39
Muscle — Regeneration of muscles after cardiotoxin injury. I. Cytological aspects, 171
Myeloma — Human serum reacting specifically with a subset of 1b-tubulin isoforms, 157

N

Near-UV irradiation under anoxia — G_1 and G_2 arrest achieved in root meristems by black light irradiation under anoxia, after DNA bromosubstitution, 119
Neoglycoprotein — Lectin-like components in the macronuclear replication bands of *Euplotes eurystomus*, 95

Neoplastic transformation — Growth of normal and neoplastic rat pleural mesothelial cells in the presence of conditioned medium from neoplastic mesothelial cells, 293
Neuromuscular junction — Regeneration of muscles after cardiotoxin injury. I. Cytological aspects, 171
Neurotrophic factor — Blastema cell proliferation *in vitro* : effects of limb amputation on the mitogenic activity of spinal cord extracts, 183
Nuclear lectin — Lectin-like components in the macronuclear replication bands of *Euplotes eurystomus*, 95
Nucleolar organizer — Comparative study of molecular characteristics of X and Y nucleolar organizers of various lines of *Drosophila melanogaster*, 201
Nucleolar vacuoles — Three-dimensional electron microscopy of the nucleolus and nucleolus-associated chromatin (NAC) during early germination of *Zea mays* L., 65
Nucleolonema — Three-dimensional electron microscopy of the nucleolus and nucleolus-associated chromatin (NAC) during early germination of *Zea mays* L., 65
Nucleoli — Replication bands and nucleoli in the macronucleus of *Euplotes eurystomus* : an ultrastructural and cytochemical study, 83
Nucleolus — Lectin-like components in the macronuclear replication bands of *Euplotes eurystomus*, 95 — Quantitative ultrastructural study of nucleolus-organizing regions at some stages of the cell cycle (G0 period, G2 period, mitosis), 211
Nucleolus-associated chromatin — Three-dimensional electron microscopy of the nucleolus and nucleolus-associated chromatin (NAC) during early germination of *Zea mays* L., 65
Nucleolus organizing regions — Quantitative ultrastructural study of nucleolus-organizing regions at some stages of the cell cycle (G0 period, G2 period, mitosis), 211
Nucleus — Three-dimensional computer reconstructions from serial sections of cell nuclei, 111

O

Osmium-amine-silver-staining — Replication bands and nucleoli in the macronucleus of *Euplotes eurystomus* : an ultrastructural and cytochemical study, 83
Oxygen consumption — Microcalorimetric studies of hybridoma cells, 33

P

Pancreas — Immunocytochemical localisation of GABA in endocrine cells of the rat entero-pancreatic system, 265
Paramecium — The somatic function of the micronucleus in asexual reproduction of *Paramecium* : thermosensitivity of amicronucleates, 219
Periodic acid — Ultrastructural localization of glycoproteins in rabbit fibroblasts altered by *Herpes simplex* virus type 1 infection, 47
Plasmalemma — *In vivo* binding of auxin to the plasmalemma and tonoplast of parenchymal cells in the wheat coleoptile, 275
Ploidy — Transferrin secretion and hepatocyte ploidy : analysis at the single cell level using a semi-automatic image analysis method, 125
Polarity reversal — Polarity reversal of inside-out thyroid follicles cultured within collagen gel : structure of the junctions assessed by freeze-fracture and lanthanum permeability, 133

R

Rabbit fibroblast cells — Ultrastructural localization of glycoproteins in rabbit fibroblasts altered by *Herpes simplex* virus type 1 infection, 47
3D-reconstruction — Three-dimensional computer reconstructions from serial sections of cell nuclei, 111
Repetitive sequences — Isolation of developmentally regulated genes in *Drosophila melanogaster*, 57
Replication bands — Replication bands and nucleoli in the macronucleus of *Euplotes eurystomus* : an ultrastructural and cytochemical study, 83
Ribosomal DNA units — Comparative study of molecular characteristics of X and Y nucleolar organizers of various lines of *Drosophila melanogaster*, 201
Ribosomal insertions — Comparative study of molecular characteristics of X and Y nucleolar organizers of various lines of *Drosophila melanogaster*, 201
Ribulose bisphosphate carboxylase — Immunocytochemical detection of ribulose bisphosphate carboxylase in capsicum plastids, 289
Rough endoplasmic reticulum — A membrane preparation that contains proteins characteristic of the rough endoplasmic reticulum, 281

S

Serum substitute in cell culture — Culture of an epithelial cell line (MDCK) with a serum substitute, 241
SIMS — Changes in iodine mapping in rat thyroid during the course of iodine deficiency : imaging and relative quantitation by analytical ion microscope, 145
Singularities — Spatial organization of collagen in annelid cuticle : order and defects, 17
Spinal cord — Blastema cell proliferation *in vitro* : effects of limb amputation on the mitogenic activity of spinal cord extracts, 183
Sponge — The iron mineralization of *Spongia officinalis* L. (Porifera, Dictyoceratida) and its relationships with the collagen skeleton, 189
Spongin digestion — The iron mineralization of *Spongia officinalis* L. (Porifera, Dictyoceratida) and its relationships with the collagen skeleton, 189

T

Thiocarbohydrazine — Ultrastructural localization of glycoproteins in rabbit fibroblasts altered by *Herpes simplex* virus type 1 infection, 47
Thyroid follicle activity — Changes in iodine mapping in rat thyroid during the course of iodine deficiency : imaging and relative quantitation by analytical ion microscope, 145
Tight junctions — Polarity reversal of inside-out thyroid follicles cultured within collagen gel : structure of the junctions assessed by freeze-fracture and lanthanum permeability, 133
Tonoplast — *In vivo* binding of auxin to the plasmalemma and tonoplast of parenchymal cells in the wheat coleoptile, 275
Toxoplasma gondii — Membrane fluidity of *Toxoplasma gondii* : a fluorescence polarization study, 11
Transcription fidelity — G_1 and G_2 arrest achieved in root meristems by black light irradiation under anoxia, after DNA bromosubstitution, 119
Transferrin secretion — Transferrin secretion and hepatocyte ploidy : analysis at the single cell level using a semi-automatic image analysis method, 125
Triacylglycerol storage — Biochemical and ultrastructural features of human fibroblasts cultured from a new variant of type 3 lipid storage myopathy, 39
Tubulin isoforms — Human serum reacting specifically with a subset of 1b-tubulin isoforms, 157

U

Ultroser G — Culture of an epithelial cell line (MDCK) with a serum substitute, 241

W

Wheat — *In vivo* binding of auxin to the plasmalemma and tonoplast of parenchymal cells in the wheat coleoptile, 275
Whole mount electron microscopy — Ultrastructural localization of concanavalin A receptors in the plasma membrane : association with underlying actin filaments, 1

Z

Zea mays — Three-dimensional electron microscopy of the nucleolus and nucleolus-associated chromatin (NAC) during early germination of *Zea mays* L., 65
